- 24 V DC supply
- Recommended modules: HiC2025(A) (AI), HiC2031 (AO), HiC2081 (TI), HiC2831R5 (DI), HiC2883 (DO), HiC2441 (UIO)
- Hazardous area: spring terminals, blue
- Non-hazardous area: Sub-D connector (male), 25-pin

### Function

The function of the termination board and the connector pin assignment are exactly fitted to the requirements of the Foxboro FBM system. The signal is output to the process control system via the system connector. The connection to the separate HART Communication Board is realized via a HART connection cable. Information about a missing supply voltage of the isolators is available for the system as a volt-free contact. The termination board has a robust glass fiber reinforced plastic housing. The termination board is mounted in the switch cabinet on a 35 mm DIN mounting rail according to EN 60175.

### Application

For detailed listing of connectable cards and recommended modules see application section.
